

## Hello my dear customer!

Thank you for downloading that model, I hope you will like it!

It's a Free Preview model of the full series, called "**Earth Photorealistic**":

[www.turbosquid.com/Search/Index.cfm?keyword=gerhald3d+earth&media\\_typeid=2&referral=gerhald3d](http://www.turbosquid.com/Search/Index.cfm?keyword=gerhald3d+earth&media_typeid=2&referral=gerhald3d)

So, that model is the same and the ONLY difference is **TEXTURES QUALITY**.

Also, I added one of the models (Earth 8K) on Sketchfab, so you can take a look right now and **INSPECT it even more:**

<https://sketchfab.com/models/f972fb1858324bac80e31440ef7b1f5a>

### THAT SERIES INCLUDES:

- Earth Photorealistic 4K - 49\$
- Earth Photorealistic 8K - 99\$
- Earth Photorealistic 16K - 159\$
- Earth Photorealistic 32K - 249\$

### ADVANTAGES of my models:

- **NO ANY ARTIFACTS, NO POLES**
- **NO VISIBLE SEAMS**
- **ABSOLUTELY CLEAR**
- UV map made in cubic projection as you can see on the preview photo, which:
  - 1) Saves 85% polygons in comparison with UV-sphere.
  - 2) Super simple cubic UV-map with no any stretching.
  - 3) I repeat that one more time: **NO ARTIFACTS ON POLES AND NO VISIBLE SEAMS** (because of edge padding made and cubic projection)
- Smoothable.
- All materials and textures are intelligently named.
- Formats .MAX, .C4D, .OBJ, .FBX are included.

You will definitely not find such textures for free in internet, I already tried)

---

You can find my other models by that link:
